Summer 2012—Update

Summer 2012 is about half way over. The Public Works department has been very busy with a number of projects. Here's an update:

- The Water & Sewer Division has installed a new water line that will serve the new St. Joseph's Hospital site. Testing has been completed. Last week the IEPA gave us verbal approval on our operating permit for the new line.
- The Street & Alley Division has completed the installation of a French drain system that lies in the area between Northwest Manor Drive and the KC Hall parking lot.
- The Broadway widening project bid opened on June 21st, and construction of that project began earlier this month. This project will widen the lanes and shoulders to meet up with the wider lanes already in place from Helvetia to the east., laying the frame work for a third lane (turn lane) to be added at a later date. The deep ditches along Broadway in that area will also be addressed with this project. Construction is expected to be completed before school starts in August.
- A culvert replacement project on Dolphin Drive that is scheduled for this summer has yet to begin. The Street Department will replace failing culverts in the area and assist with drainage issues.
- The Parks & Recreation Department will be extending the Multi-Use Path along Sportsman Road from Koepfli Lane to Glik Park. Public Work's resident engineer, Clint Conrad, will be assisting that department with this project as well. This project has been delayed, but is expected to begin in August.
- The Sanitary Sewer Cured-in-Place Pipe project, awarded to Walden Associated Technologies in April, got underway this week. This project will clean, televise, and reline 5,870 linear feet of old sewer lines in an area from 8th Street to 13th Street and from Walnut Street to Chestnut Street. The city received funds from the Madison County Development Block Grant to pay for this project.
